AI Predictions & Insights

weightGoal: WARNING

You are 23.0 kg above your target weight of 70 kg
Recommendation: Consider adjusting your calorie intake and increasing physical activity to reach your goal.

untrackedConditions: INFO

2 condition(s) from your health profile are not being tracked: High Blood Pressure, Diabetes
Recommendation: Add these conditions to your chronic disease tracker for better monitoring and personalized insights.

labResults: WARNING

2 abnormal biomarker(s) in your latest lab report: SERUM UREA, SERUM CREATININE
Recommendation: Review these results with your healthcare provider. Consider repeat testing as recommended by your doctor.

stress: WARNING

Your stress level is high (score: 68/100)
Recommendation: Practice stress management techniques: deep breathing, meditation, or gentle exercise. Consider speaking with a counselor if stress persists.

medicationAdherence: CRITICAL

Medication adherence is at 0% (2/498 doses taken)
Recommendation: Set reminders for your medications. Skipping doses can worsen your health conditions. Use the medicine adherence tracker to stay on schedule.

untreatedConditions: INFO

1 condition(s) (High cholestrol) have no medications tracked
Recommendation: Add medications for these conditions in the Medicine Adherence tracker to ensure proper management.
